The Stealth LoK™ QD System is a patent pending Quick disconnect system that is proprietary to Engaged Industries Suppressors.

The Stealth LoK QD™ System was designed to be an upgrade attachment system for any suppressor brand using 1.375-24 threads, sometimes referred to as "HUB" thread.

The Stealth LoK™ QD system allows the suppressors to be rapidly installed on multiple firearms. 6 locking lugs and the ability for the suppressor to be installed in any orientation, makes it quick and easy to attach in any scenario including total darkness. without any ratcheting mechanisms, it is very stealthy when connecting and disconnecting, giving the attachment device it's name.
